

Change Standby/Sleep Timers

STEP 1

Go to www.online.valorpaytech.com and enter your login credentials.

STEP 2

Select **Device Management** in the sidebar

STEP 3

Search the merchant by name or EPI, select the vertical ellipsis and select **EditParameter**.

The screenshot shows the Merchant Management interface. A search bar at the top contains the text 'randall'. Below the search bar, there is a table of merchants. The first merchant is 'Randall's Test Store' with EPI: 2032977754 and VER: 1.2.35. A callout box highlights the vertical ellipsis menu for this merchant, and an arrow points to the 'EditParameter' option. Other merchants listed include 'Randalls Test 2 Merchant' and 'Randalls Test 2162021'.

STEP 4

On the top left, you'll see Standby Time, on the top right, you'll see Sleep Time. Standby mode on the terminal is when the screen dims and Sleep mode is when the screen turns off. When the device goes into Sleep mode, it disconnects the internet connection to conserve battery life.

The screenshot shows the 'TERMINAL & TRANSACTION' settings page. On the left side, there is a 'STANDBY TIME' section with a value of '10' and a 'MINS' label. A callout box highlights this value. On the right side, there is a 'SLEEP TIME' section with a value of '15' and a 'MINS' label. A callout box highlights this value. Other settings include 'PROCESSOR' (Tsys Sierra), 'AVS' (NONE), 'SPLIT PAYMENT' (YES/NO), 'CASH BACK ON DEBIT CARDS' (YES/NO), and 'PIN BYPASS ALLOWED' (YES/NO). There is also a 'BATCH OUT' section with 'SETTLEMENT TIME (EST)' set to '09:00 AM'.

STEP 5

After making parameter changes, you must perform a download on the device by pressing ★ > 6 > OK button.
