## Abbreviations and Acronyms

This section provides a list of abbreviations and acronyms with their appropriate full forms to improve user comprehension.

Abbreviation	Full form
EMV	Europay, Mastercard and Visa
ISO	Independent Sales Organization
POS	Point of Sale
Sub-ISO	Subsidiary Independent Sales Organization
ACH	Automated Clearing House

## Introduction

Enabling ACH transaction capabilities on your Valor’s Virtual terminal allows you to offer your customers the convenience of ACH payments while ensuring secure and compliant transaction processing. To enable ACH payments through the Valor terminal, it is essential to generate an API key and token from ACH banking platform.

## Objective & scope

This user guide provides step-by-step instructions for ISOs and merchants to generate API keys and tokens from the ACH banking platform and configure them within your Valor portal to enable ACH transactions.

## Prerequisites

1. Originator Credentials for ACH banking.
2. User credentials of ISO with access to ACH module.
3. Merchant Details for Onboarding.
4. Stable internet connectivity.

## Benefits

**ACH transactions** offer a seamless and cost-effective way for merchants to accept payments directly from a customer’s bank account. Additional benefits of integrating ACH payments into the Valor Portal include:

- **Support for recurring billing:** Ideal for subscription-based services or instalment plans, ACH can be linked with Valor’s recurring billing system to automate withdrawals.
- **Vault integration:** ACH account details can be securely stored in the Valor Vault, allowing for repeat payments without re-entering banking information.
- **Portal-based management:** Merchants can initiate, manage, and track ACH transactions directly through the **Virtual Terminal** or **E-Invoice** sections of the Valor Portal—no third-party integrations required.

## Extracting API Token and Key from ACH platform

1. Navigate to the [ACH website](#).
2. Select Login from the top pane.
3. Enter User credentials and select **Log in**.
4. Select the username from the home screen, to view the user profile.

Figure 1: Home screen of ACH Banking platform.

5. Navigate to **API credentials** under **Add Auth Method** and select the Lock icon.

Figure 2: Navigating to API keys from ACH Banking platform.

On following the above steps, A pop-up dialog box containing **User's API Details** is visible.

Figure 3: User API details from ACH Banking platform

## Configuring ACH Keys for Merchants devices

ISO can configure ACH transaction for their merchants in Valor Portal, while adding a Virtual terminal device to the store.

### Adding Virtual Terminal with ACH transaction – ISO.

1. Navigate and Select **Add Device** under Merchant Overview screen.
2. Select **Virtual Terminal**, from **Device** dropdown list.
3. Fill all mandated fields, visible in the add device page.
4. Select **ACH** tab, to configure Virtual Terminal for ACH transactions.
5. Select **ACH Banking**, from the Vendor dropdown list.
6. Enter API Token and keys generated from ACH Banking in the fields available.

The screenshot shows the 'Add Device' form in the Valor Portal. The form is titled 'Add Device' and has a close button in the top right corner. It contains several fields and sections:

- Store Name:** Chandler
- Merchant Name:** Chandler Bing
- Name \*:** VT #3
- Device \*:** Virtual Terminal
- Device Type \*:** Soft Pos
- Processor \*:** WORLDPAY
- Fiscal URL \*:** None
- Tags:** ADD TAGS
- Cash Discount & Surcharge:** Traditional, Gift Card, **ACH** (highlighted with a green box)
- Vendor \*:** ACH BANKING
- App Key \*:** (highlighted with a green box)
- Auth Token \*:** (highlighted with a green box)
- Status:**
- SAVE AND EXIT:** (button)

Figure 4: Configuring API keys to a Virtual device.

7. Select **SAVE AND EXIT**.

The configured device will support ACH transactions.

## Executing an ACH Transaction

Virtual Terminal of Valor Portal supports two types of ACH transaction namely **ACH Sale** and **ACH Recurring**. To execute a transaction, merchant shall follow the following procedures:

Virtual Terminal  Valor Connect

Sale | Recurring | Authorization | Refund | E-Invoice | QR | Cash | **ACH**

**ACH Sale** | ACH Recurring

Amount \*  
\$ 0.00

Account Number \* \_\_\_\_\_

Routing Number \* \_\_\_\_\_

Name on Account \* \_\_\_\_\_

Phone Number \_\_\_\_\_

Email \_\_\_\_\_

Invoice Number \_\_\_\_\_

Account Type  
**CHECKING** ▼

Entry Class  
**Personal** ▼

Txn Type  
**Debit** ▼

Figure 5: Navigating to ACH transaction, In Valor Portal.

## Processing ACH Sale Transaction

With **ACH Sale** Tag, the Merchant can do both **Debit** and **Credit** sale based on their customer preference. To execute an ACH sale transaction,

1. Select **ACH sale** sub tag, Under **ACH** tag visible in the Virtual Terminal.
2. Fill transaction details, with valid **Account** and **Routing Number**.
3. Select Debit or Credit, from the **TXN Type**.
4. Select **PROCESS PAYMENT**, to execute an ACH sale.

Figure 6: Executing a sample ACH Sale transaction.

A popup screen appears displaying the status of the transaction, letting the merchant know the execution status.

### Processing ACH Recurring Transaction

With **ACH Recurring** Tag, the Merchant can set a recurring transaction for their customers.

1. Select **ACH Recurring** sub tag, Under **ACH** tag visible in the Virtual Terminal.
2. Fill transaction frequency and other details, with valid **Account** and **Routing Number**.
3. Select **PROCESS PAYMENT**, to execute an ACH recurring transaction.

The screenshot shows the 'Virtual Terminal' interface with the 'ACH' tab selected. The 'Expires' section has 'Expire After 6 Days' selected. The 'Billing Detail' section contains the following information:

Amount *	Account Number *	Routing Number *
\$ 5.00	921510217	021000021
Name on Account *	Invoice Number	Phone Number
ABU	c8e935d730	848-449-4612
Email	Account Type	Entry Class
murali.k@valorpaytech.com	CHECKING	Personal
Txn Type		
Debit		

At the bottom of the form, there are two checkboxes: 'Create / Update Invoice in QB' and 'Send invoice email to client from QB'. On the right side, a 'Summary' box shows 'Base Amount \$ 5.00' and 'Total Amount \$ 5.00'. Below the summary are 'CANCEL' and 'PROCESS PAYMENT' buttons, with the 'PROCESS PAYMENT' button highlighted with a green border.

Figure 7: Executing a sample ACH Recurring transaction.

A popup screen appears displaying the status of the recurring transaction, letting the merchant know the execution status.

## ACH Settings – Merchant

ACH settings in the Valor Portal allow merchants to select the preferred mode for sharing transaction receipts with their customers.

The screenshot shows the 'Settings' page with 'ACH Settings' selected in the top navigation bar. Under 'ACH Settings', the 'Send All receipts to Mail or SMS \*' section has 'Email' selected. At the bottom are 'CANCEL' and 'UPDATE' buttons. On the right, a preview of an email receipt is shown:

**A sample Email receipt.**

<b>Chandler</b>	Date: 03/24/2025
Sample Address, Brooklyn, US. 1221334332	Time: 08:53 AM EST

**\$5.00**

Submitted

Your ACH Recurring has been submitted.

For additional information on this Transaction, please contact murali.k@valorpaytech.com

Thank you  
ABU

Figure 8: Merchant ACH settings – Email receipt.

## ACH Threshold – ISO & Merchant

ISO can set an ACH Threshold for their merchant, based on which an ACH transaction is executed. Merchant can view the set ACH Threshold under this tag and align their transactions, accordingly.

Figure 9: Merchant view on set ACH Threshold.

## Transaction Module

Valor provides separate tabs to view and manage all types of ACH Transactions, under the transaction module.
