Acronyms and their abbreviations

This section contains the acronyms used in this document, along with their corresponding full forms, to enhance user comprehension.

Abbreviation	Full Form
ISO	Independent Sales Organization
Sub-ISO	Subsidiary Independent Sales Organization

Introduction

The Valor PayTech integration with QuickBooks user guide is a comprehensive document crafted to guide QuickBooks users through the integration process with the Valor Portal. This integration offers a quick way to manage financial transactions, refunds, recurring payments, invoices, customer information, and inventory. Whether you're a seasoned QuickBooks user or new to financial management, this guide will take you through every step required to integrate Valor PayTech with QuickBooks. Our aim with this integration is to transform how you track sales, manage customers, and update inventory efficiently.

Note: This integration is compatible only with QuickBooks Online.

Objective & scope

The objective of this guide is to provide step-by-step instructions on effectively integrating Valor PayTech solutions with QuickBooks accounting software. We aim to help you maximize the efficiency of your financial operations, reduce the margin for error, and optimize your business performance.

The scope of the document encompasses the following aspects:

- 1. Initial setup:** Instructions for establishing a connection between Valor PayTech and QuickBooks, setting up your account, and configuring the necessary settings for synchronization.
- 2. Daily operations:** Detailed processes for managing transactions, including creating invoices, processing payments and refunds, and updating customer and inventory information.
- 3. Troubleshooting and support:** Guidelines for resolving common issues that may arise during the integration process and information on accessing further assistance and customer support services for reintegration.
- 4. Best practices:** Guidelines for resolving common integration issues and offers information on accessing additional assistance and customer support services for reintegration.

Prerequisites

Access to QuickBooks integration is exclusive to ISOs and merchants and is facilitated through the Valor Portal. To utilize this feature, merchants must have login access to the Valor Portal. You can access the Portal by following this link: <https://online.valorpaytech.com>

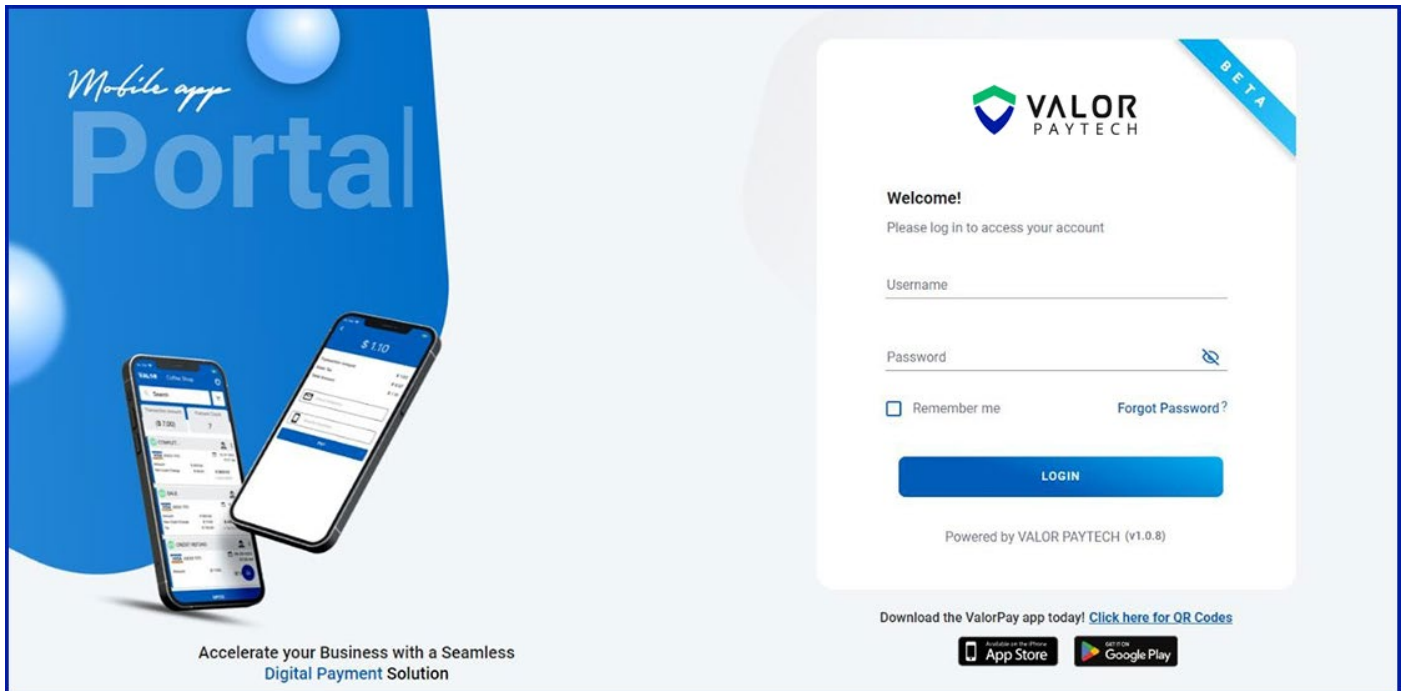

Figure 1: Improved Portal login screen

QuickBooks integration is available to subscribed ISOs only. Merchants can access this feature once the ISO or sub-ISO grants access. ISO or sub-ISO users can enable or disable this module for their merchants as needed, and merchants can do the same for their operators.

Benefits

1. Seamless workflow integration

Valor and QuickBooks seamlessly integrate, ensuring a smooth workflow. You can now integrate Valor with QuickBooks in just a few clicks and watch your workflow transform. This minimizes disruptions to your workflow and eliminates manual data entry, making your processes more efficient and error-free.

2. Quick & accurate financial management

QuickBooks integrated with Valor streamlines e-invoices management. It helps to effortlessly generate e-invoices and promptly update payment transaction details for precise and current financial records.

3. Efficient customer & inventory management

Valor and QuickBooks work seamlessly together, enabling smooth two-way customer and inventory data updates. Automatic updates streamline customer relationships and inventory management, ensuring consistency.

4. Transaction automation

Transition effortlessly to total transaction automation with Valor & QuickBooks. Easily import and sync sales, recurring transactions, refunds, e-invoices, and PayNow links into QuickBooks.

QuickBooks and Valor Portal integration: Step-by-step instruction

To integrate QuickBooks with the Valor Portal, you need to follow these steps:

Step 1: Log in to the Valor Portal with your merchant credentials, and the homepage will appear.

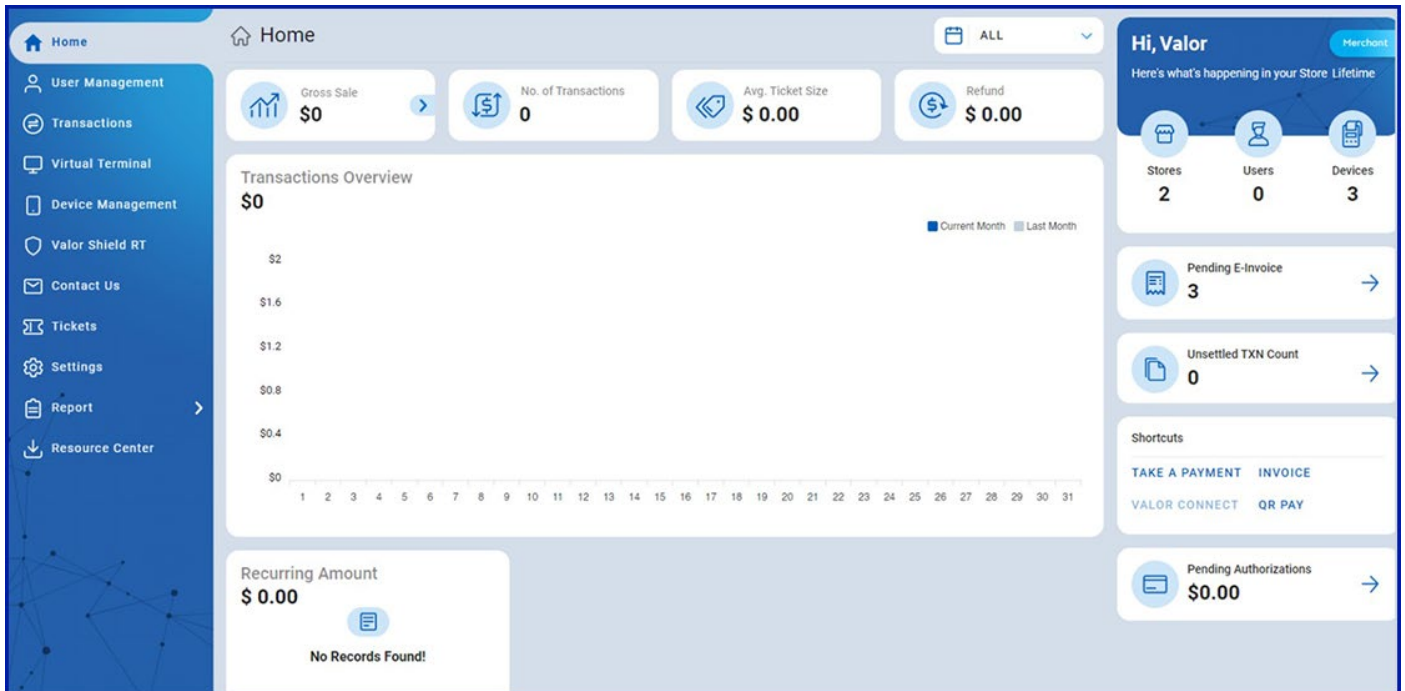

Figure 2: Homepage of the Valor Portal

Step 2: Click 'Settings' on the left navigation bar. Then, click on the 'QuickBooks' tab, 'QuickBooks Configuration' and click 'Authenticate' to start the integration process.

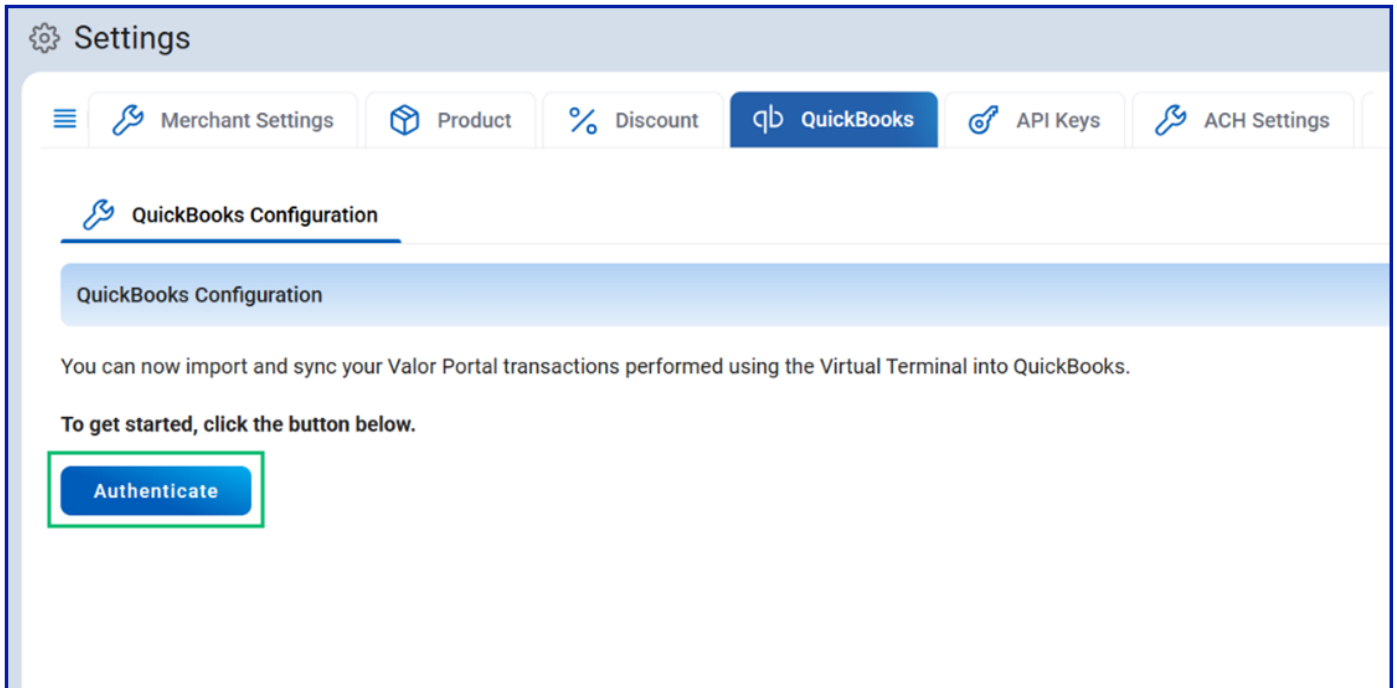

Figure 3: QuickBooks page of the Valor Portal highlighting the 'Authenticate' button

Step 3: The QuickBooks login page will appear. Sign in with your QuickBooks credentials.

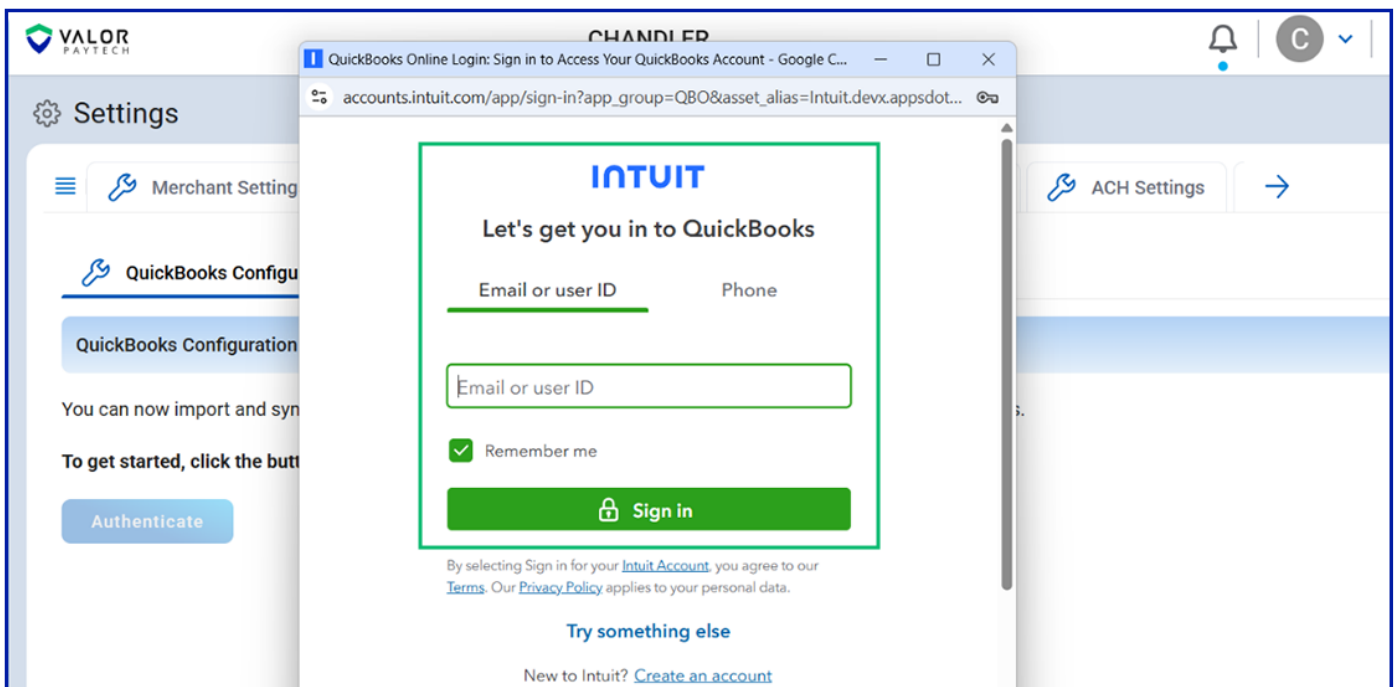

Figure 4: QuickBooks login window

Step 4: Once your login has been successful, your customer ID and status confirmation will appear within a few seconds. Once the details appear, the integration process has been completed.

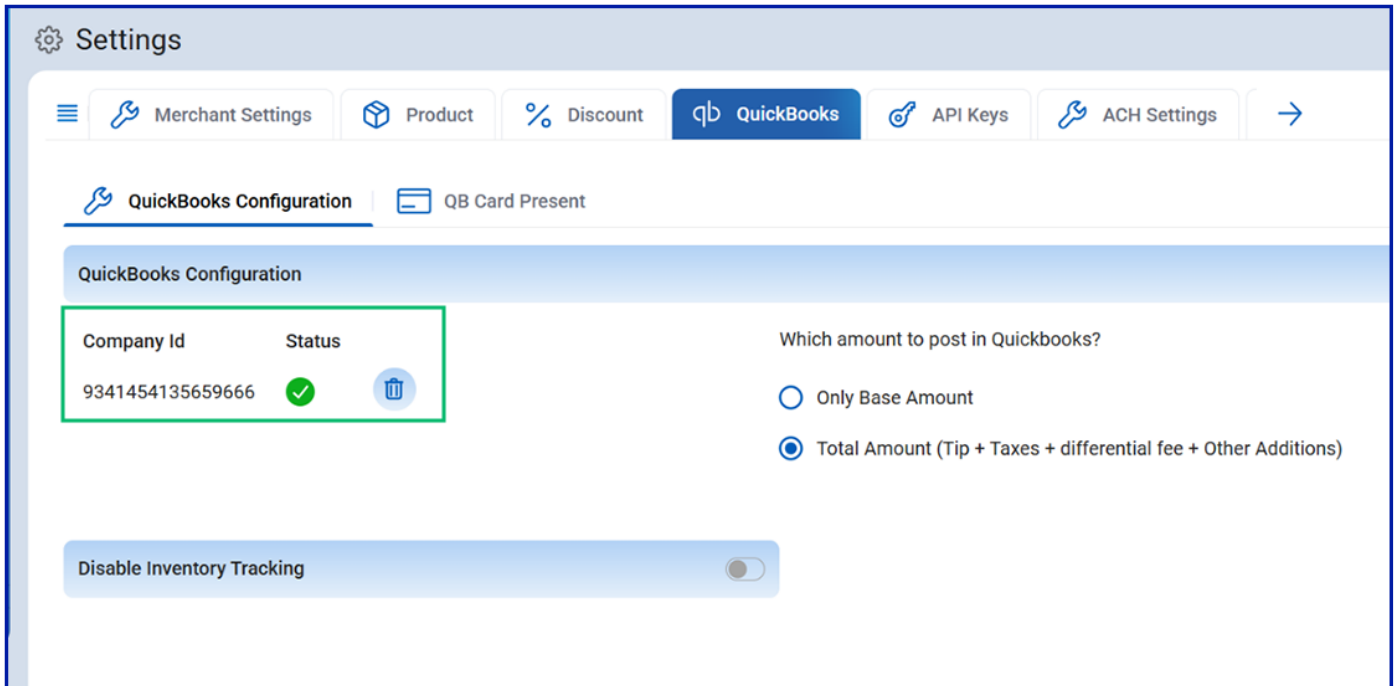

Figure 5: QuickBooks details appear after integration

Step 5: To remove the integrated ID, click the delete icon. A confirmation box will then appear. Confirm to complete the deletion process. To reintegrate, you can easily click 'authenticate' again and follow the procedure.

Transaction processing in the Valor Portal & automatic updates in QuickBooks

How to integrate Sale transactions with QuickBooks

To sync a Sale transaction with QuickBooks while using the Virtual Terminal, the following steps need to be followed:

1. Navigate to the Virtual Terminal page.
2. To sync this transaction with QuickBooks, select the 'Create/Update Invoice in QB' checkbox during the sale transaction process.
3. Go for 'Send invoice email to client from QB' if the email for the transaction is to be sent from QB.
4. The sale transaction will automatically update in QuickBooks once the payment is processed.

The screenshot shows the 'Virtual Terminal' interface with the 'Sale' tab selected. The page contains several input fields for transaction details: Amount (* \$ 0.00), Customer Name, Phone Number, Email, Dynamic Descriptor (Grocery Stores), Invoice Number, Description, Valorpaytech, and Clerk ID. There are two checkboxes highlighted with a green box: 'Create / Update Invoice in QB' and 'Send invoice email to client from QB'. Below these are sections for 'Line Items' and 'Customer Address'. An 'UPLOAD' button is located in the top right corner.

Figure 7: Sale page of Virtual Terminal

How to integrate Recurring payments with QuickBooks

To integrate Recurring payments with QuickBooks, the following steps need to be followed:

1. Navigate to the Recurring tab.
2. Perform the recurring payment as usual.

3. During the payment process, select the 'Create/Update Invoice in QB' checkbox to sync this recurring payment with QuickBooks or 'Send invoice email to client from QB' if the email is to be sent from QB.
4. The recurring payment transaction will automatically update in QuickBooks once processed.

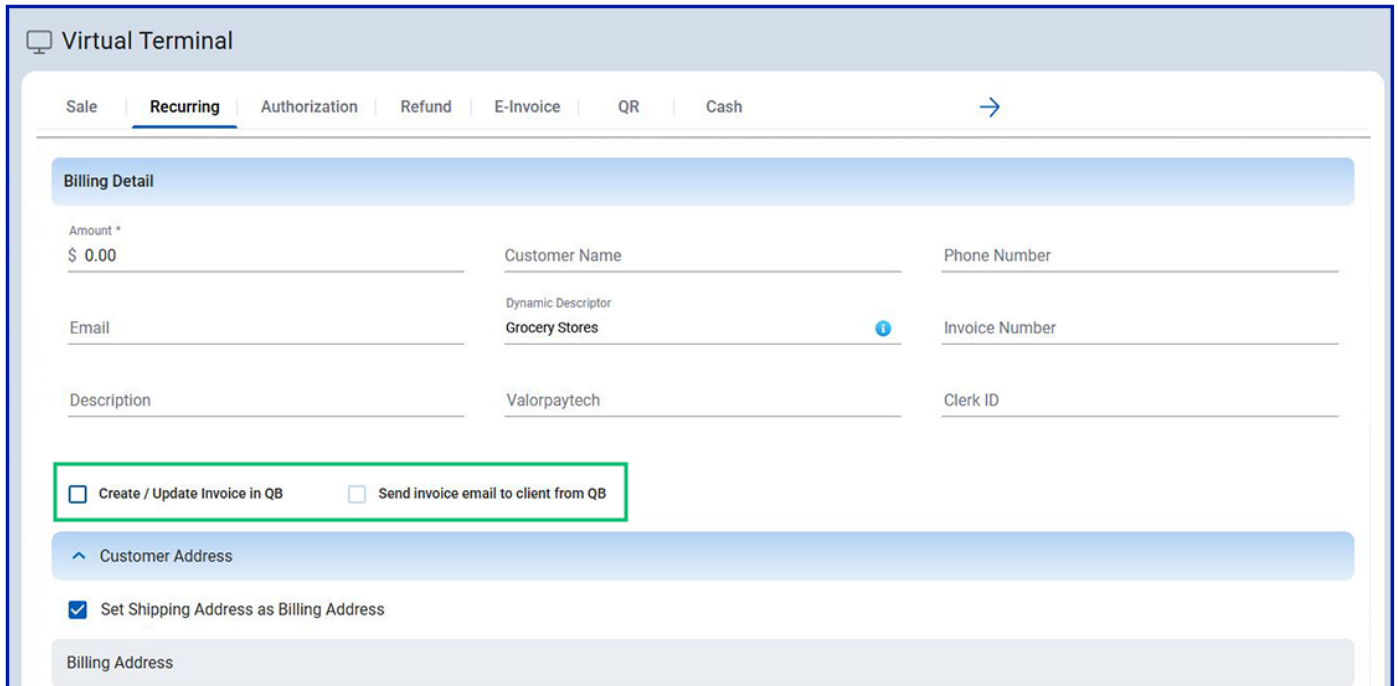

Figure 8: Recurring payments page of Virtual Terminal

How to integrate Refund transactions with QuickBooks

To integrate Refund transactions with QuickBooks, follow these steps:

1. Navigate to the Refund tab.
2. Process the refund transaction as usual.
3. Select the 'Payment Sync in QB' checkbox during the refund process if you want this refund transaction to be synced with QuickBooks.
4. The refund transaction will automatically update in QuickBooks once processed.

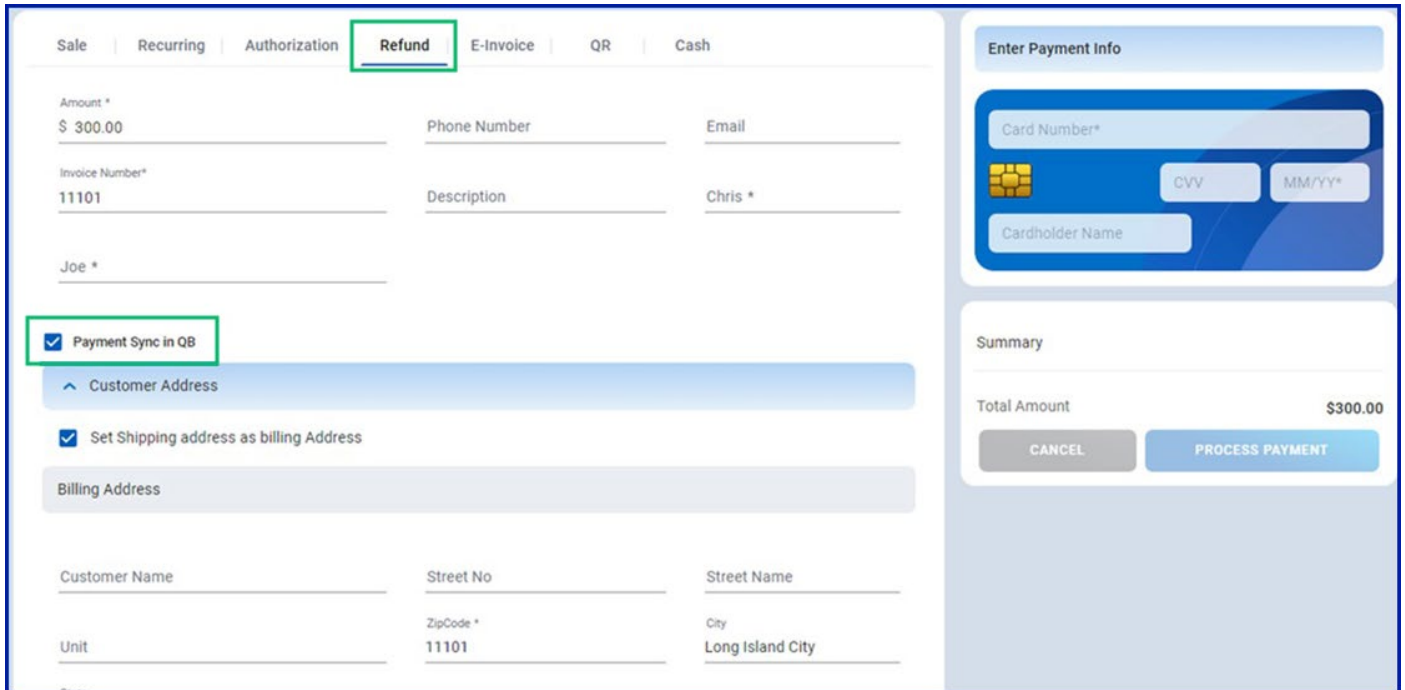

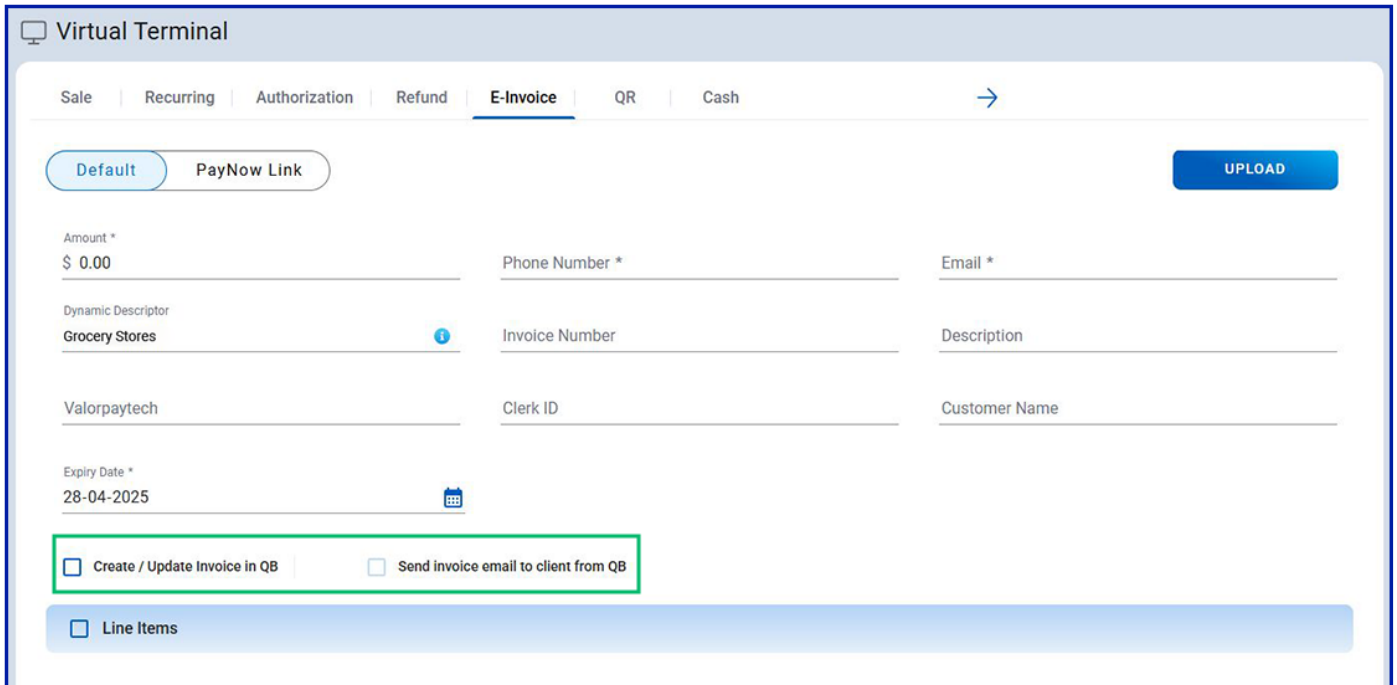

Figure 9: Refund page of Virtual Terminal

How to create & update an E-invoice & integrate with QuickBooks

To create or update invoices in QuickBooks and integrate them with E-Invoice, follow these steps:

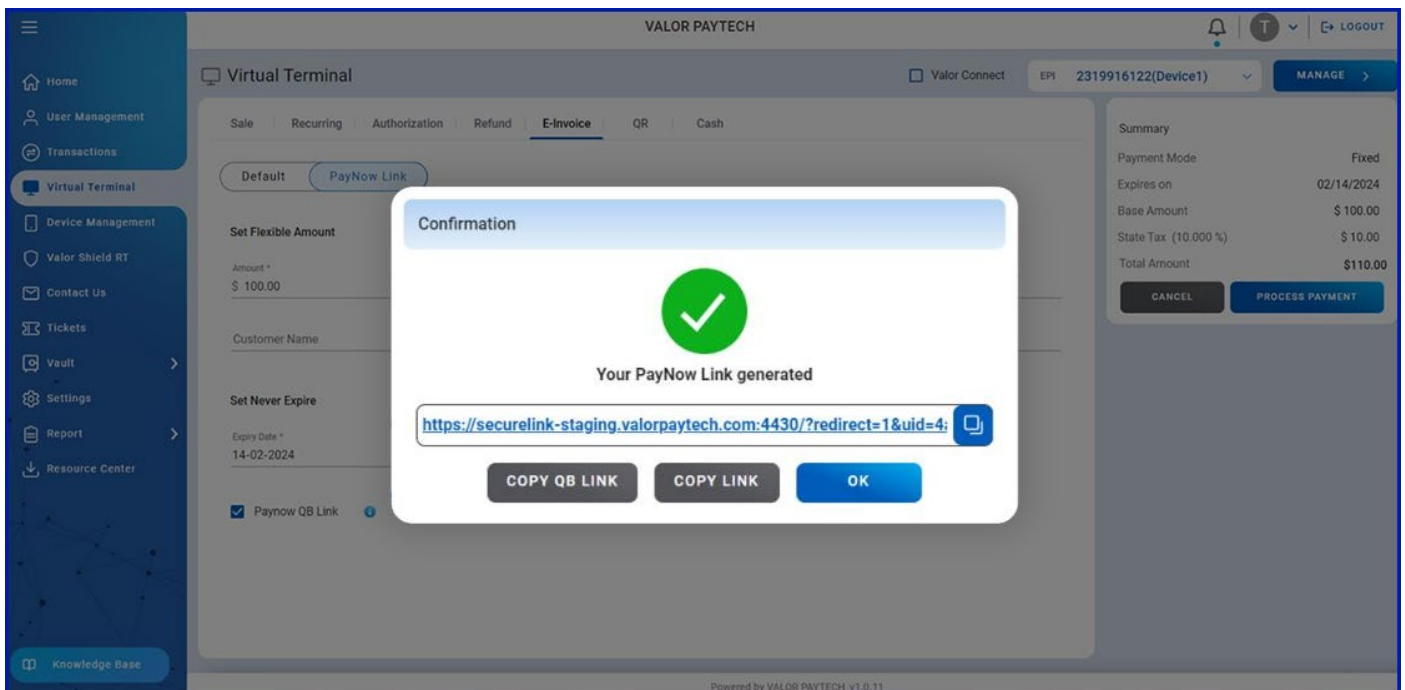

1. Navigate to the E-Invoice tab. You can create or update invoices in QuickBooks here.
2. Select the 'Create/Update invoice in QB' checkbox during the payment process if you want the e-invoice to be synced with QuickBooks or select or 'Send invoice email to client from QB' if the email is to be sent from QB.

The screenshot shows the 'Virtual Terminal' interface with the 'E-Invoice' tab selected. The page includes fields for 'Amount *' (\$ 0.00), 'Phone Number *', 'Email *', 'Dynamic Descriptor' (Grocery Stores), 'Invoice Number', 'Description', 'Valorpaytech', 'Clerk ID', 'Customer Name', and 'Expiry Date *' (28-04-2025). There are checkboxes for 'Create / Update Invoice in QB', 'Send invoice email to client from QB', and 'Line Items'. An 'UPLOAD' button is located in the top right corner.

Figure 10: E-invoice page of Virtual Terminal

- The PayNow link generated can be used for email template feature available within QuickBooks.

The screenshot shows the 'Virtual Terminal' interface with the 'E-Invoice' tab selected. A 'Confirmation' modal is displayed in the center, indicating that the 'PayNow Link' has been generated. The modal contains a green checkmark icon, the text 'Your PayNow Link generated', and a link: <https://securelink-staging.valorpaytech.com:4430/?redirect=1&uid=4>. Below the link are buttons for 'COPY QB LINK', 'COPY LINK', and 'OK'. The background shows the 'E-Invoice' form with fields for 'Amount *' (\$ 100.00), 'Customer Name', 'Set Never Expire', 'Expiry Date *' (14-02-2024), and a checked checkbox for 'Paynow QB Link'. A 'Summary' panel on the right shows payment details: Payment Mode (Fixed), Expires on (02/14/2024), Base Amount (\$ 100.00), State Tax (10.000 %) (\$ 10.00), and Total Amount (\$110.00). Buttons for 'CANCEL' and 'PROCESS PAYMENT' are also visible.

Figure 11: Pay Now Link confirmation box

- Once the payment is processed, the transaction will automatically update in QuickBooks. All transactions will be reflected in your QuickBooks account. To view them, log in to the

QuickBooks platform and navigate to ‘Sales’ under ‘Invoices.’ Your deposited, paid, due, and overdue transactions will appear here.

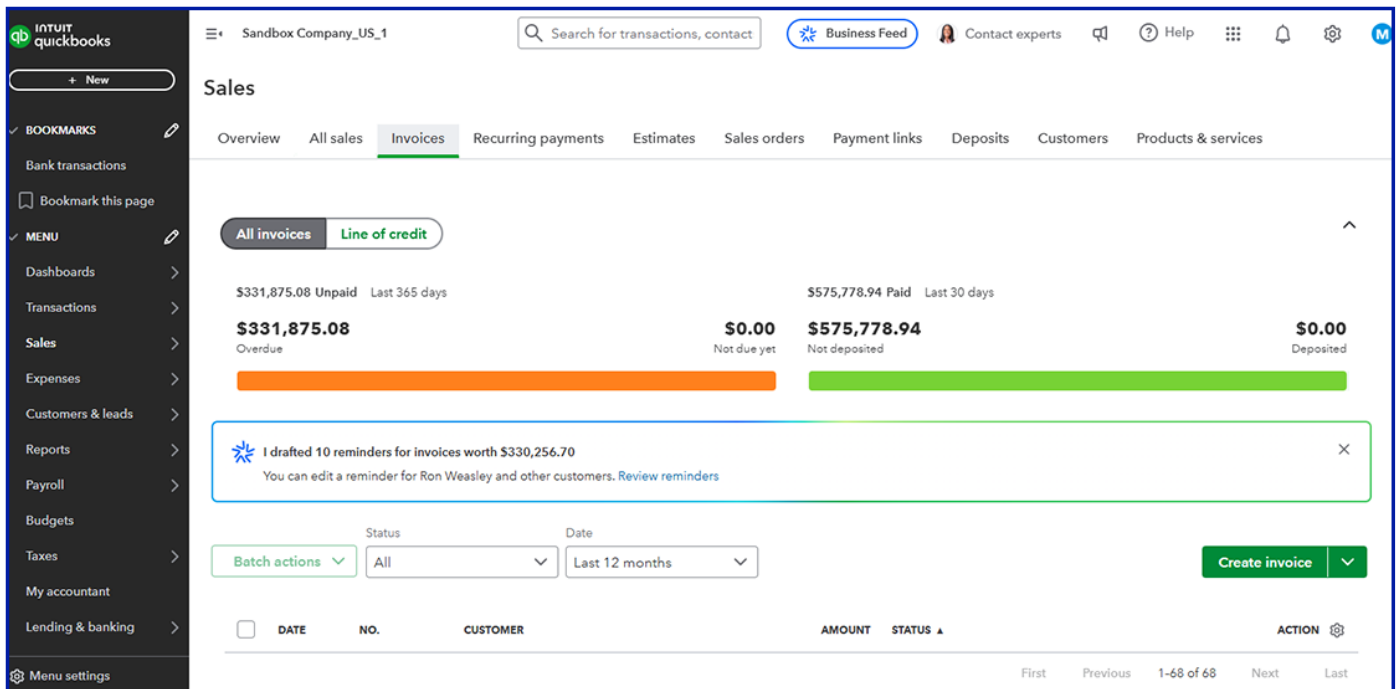

Figure 12: QuickBooks invoices

How to generate a QuickBooks report

A QuickBooks report provides a comprehensive list of transactions synced with QuickBooks, specifically those conducted via the Virtual Terminal. Follow these steps to generate a QuickBooks report:

1. Log in to the Valor Portal with your credentials.
2. Navigate to the 'Reports' section on the left navigation bar. Select the ‘QuickBooks Reports’ option from the list of options.

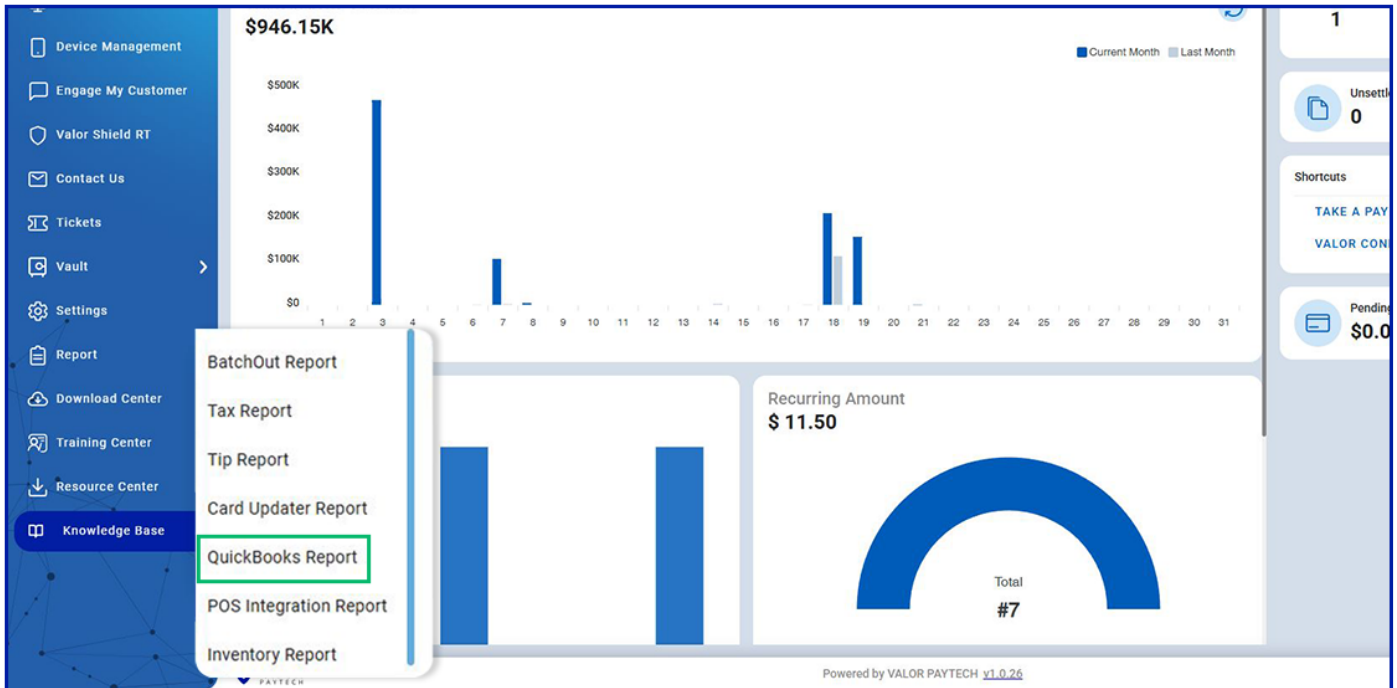

Figure 1313: QuickBooks report

3. The QuickBooks report page will appear, displaying all transactions synced with QuickBooks.
4. Access details of individual transactions or view lists of transactions.

QuickBooks Reports

Invoice Submitted Summary

EPI Search EXPORT MTD

Merchant Name	EPI	Device Label	Payment Updated #	Created Invoice #	Updated Invoice #	Failed Count	Updated On
Chandler		-	0	0	0	3	04/07/2025

7. After selecting and clicking 'Export,' your report will be automatically downloaded.

How to sync Card sale transactions with QuickBooks

To sync a card transaction with QuickBooks while using Valor POS device, the following steps need to be followed:

1. Navigate to the Settings page.
2. To sync this transaction with QuickBooks, select the 'QuickBooks' option and then go for the 'QB Card Present' option.
3. Select 'Auto Generated' or 'Manual' under the Invoice number section to set a minimum and maximum length limit.
4. Type in your customer's name under the 'Customer Name' section.
5. The important section to update is the 'Selected EPI'. Choose the EPIs through which the card transactions are to be synced with QuickBooks.
6. The card sale transaction will automatically update in QuickBooks once the payment is processed.

Note: For any Card Present functionality, please ensure that the associated terminal is running the latest software version that supports Card Present transactions with QuickBooks.

The screenshot shows the 'Settings' page with a navigation bar at the top containing 'Merchant Settings', 'Product', 'Discount', 'QuickBooks', 'API Keys', 'ACH Settings', and 'ACH Threshold'. The 'QuickBooks' tab is selected. Below it, the 'QuickBooks Configuration' section has a 'QB Card Present' option highlighted with a green box. The main content area is titled 'QB SYNC' and contains two sections: 'Invoice Number' and 'Customer Name'. The 'Invoice Number' section has two radio buttons: 'Auto Generated' (selected) and 'Manual'. The 'Customer Name' section has a text input field with the placeholder 'Customer Name' and the value 'POS TXN'. Below this, there is a 'Min Length' field with the value '1'. On the right side, the 'Selected Epi' section shows two EPIs: '2319935716 x' and '2319935719 x'.
