

ValorPay

Your business. In your pocket.

ValorPay gives merchants the flexibility to accept payments, manage operations, and stay connected to their business from anywhere. From Tap to Pay and ACH payments to inventory management and real-time transaction visibility, ValorPay puts powerful payment tools right in the palm of their hand.

What makes ValorPay stand out?

Smart transaction dashboard

Merchants gain access to a centralized dashboard displaying total transactions by day, week, or month. The transaction overview provides key details, including net amount, refunds, tips, pending e-invoices, and so on.

Menu & Inventory management

Manage products and inventory directly from the app. Merchants can quickly select items, build carts, and streamline the checkout experience without switching between systems.

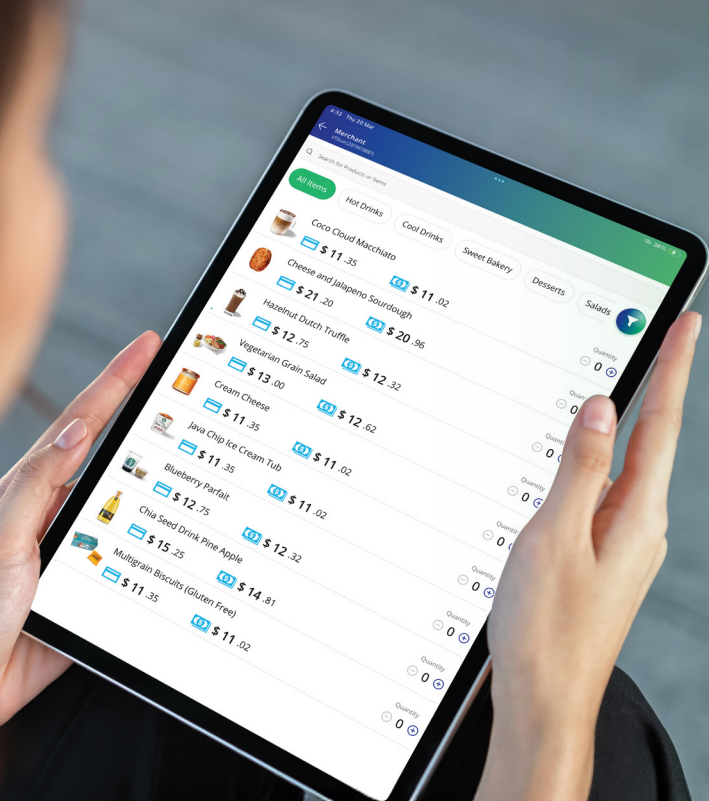

Tap to Pay

Accept contactless payments directly on a compatible mobile device without additional hardware. Customers can pay using NFC cards, and digitally stored cards in Apple, Samsung or Google Pay.

Manage stores, devices & operators

Give merchants complete visibility across their business from a single app. View stores, operators, devices, and payment activity in one place, making it easier to manage day-to-day operations on the go.

ValorPay is available for both
Android and iOS.
